- Installed** May 2010
- Integrator** Wirsol Solar AG
- Installer** Wirsol Solar AG
- Inverter** Fronius
- Mounting** Schletter

Wirsol Solar deployed Abound Solar modules for two carport installations to help reduce the energy costs of a Burger King restaurant by 45%. The concept is part of the restaurant chain's corporate responsibility program, BK Positive Steps, and will be used to test ideas for rollout across the chain's outlets.

Wirsol Solar selected Abound Solar modules for its aesthetic appearance, affordability, and ease of integration into an existing carport solution.
